

ConGlobal's Decarbonization Glidepath

Strategy For 50% Absolute Reduction by 2035

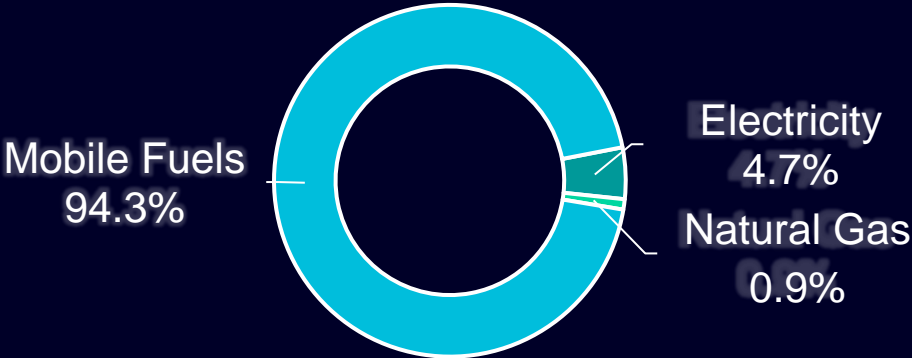

Keys to Success

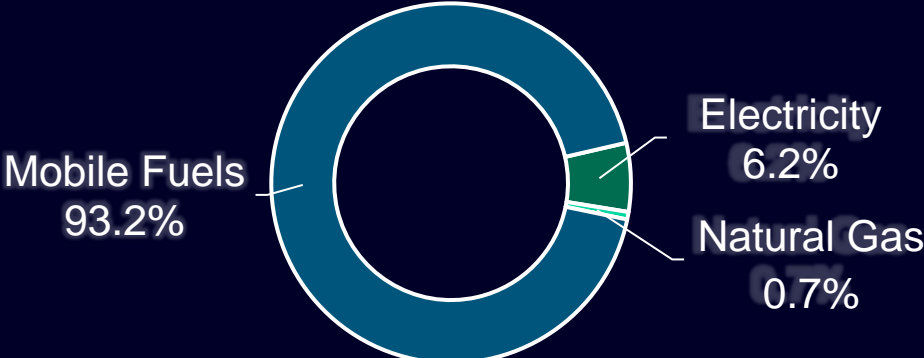

- Digitalization of Data
- Driving Process Automation
- Equipment Electrification
- Clean Electricity Sourcing
- Set OpEx & CapEx Priorities
- Pilot Projects at Key Sites

Distribution of Energy and Emissions Across ConGlobal's Operations

Energy Consumption

Portfolio Emissions

Decarbonization Priorities

- 1 Developing a vehicle and equipment electrification strategy
- 2 Sourcing clean electricity once electrification is complete
- 3 Partnering with customers, property owners, and other stakeholders on shared goals
